9. **Please note!**

1. WHAT IS NAIL BITING?

Nail biting or onychophagia (Greek for "nail eating") is a relatively common habit that affects people of all ages. It is considered to be a chronic or compulsive habit that can be triggered by anxiety, stress, insecurity and other causes. Studies show that up to 30% of the population chews their nails.

2. WHAT IS THE ACETOCAUSTIN ANTI-NAIL BITE PEN?

The Acetocaustin Anti-Nail Bite Pen effectively helps to break the habit of nail biting with just one application per day. The well-dosed bitter taste, with the world's most bitter substance Bitrex, prevents nail biting. The Acetocaustin Anti-Nail Bite Pen is applied to the nail with the easy-to-use brush pen. The applied liquid is invisible and does not shine.

3. HOW SHOULD THE ACETOCAUSTIN ANTI-NAIL BITE PEN BE USED?

First use:
To activate the pen, turn the top of the pen (only when using it for the first time) at least 15 times. Make sure that the tip of the brush pen is soaked with the liquid it contains before use.

The Acetocaustin Anti-Nail Bite Pen is a practical pen that you can use easily, accurately and quickly. Apply the Acetocaustin Anti-Nail Bite Pen to the nail edge, the side of the nail or the cuticle as required. Thanks to the use of Bitrex, the most bitter substance in the world, the Acetocaustin Anti-Nail Bite Pen does not have to be applied to the entire nail.

We recommend using the Acetocaustin Anti-Nail Bite Pen for at least 21 consecutive days. Why 21 days? The design of the Acetocaustin pen is based on the knowledge that breaking existing habits takes at least 21 days on average. The Acetocaustin Anti-Nail Bite Pen dries within seconds. The bitter taste will gradually diminish over a period of about 24 hours. The bitter anti-nail biting liquid can be washed off the hands with normal hand soap.

4. CAN THE ACETOCAUSTIN ANTI-NAIL BITE PEN BE USED TO STOP THUMB SUCKING?

The Acetocaustin Anti-Nail Bite Pen can be used to break the habit of thumb sucking. To do this, apply a little of the liquid to the tip of the thumbnail. Under supervision, the Acetocaustin Anti-Nail Bite Pen can be used on children from the age of three.

5. CAN THE ACETOCAUSTIN ANTI-NAIL BITE PEN BE USED TO STOP CHEWING THE UPPER CUTICLE?

The Acetocaustin Anti-Nail Bite Pen can be used to break the habit of biting cuticles. The liquid does not need to be applied to the cuticle. Applying it to the nail is enough.

6. CONTENTS

1 Anti-Nail Bite Pen mit 3ml

7. INGREDIENTS

Isopropylalkohol, aqua, ethyllactat, hydroxypropylcellulose, denatoniumbenzoat

8. USE BY CHILDREN OR THE ELDERLY

The Acetocaustin Anti-Nail Bite Pen can be used on adults and children from the age of three. Use by children under 12 years of age must be supervised.

9. PREGNANCY AND BREASTFEEDING

No data are available on the use of the Acetocaustin Anti-Nail Bite Pen among pregnant or breastfeeding women. We recommend that you do not use the product.

10. PLEASE NOTE!

The Acetocaustin Anti-Nail Bite Pen is applied topically. If the liquid accidentally gets into the eye, rinse with plenty of clean water. In rare cases, irritation may occur (due to an allergy to one of the ingredients). In this case, we recommend that you stop using the Acetocaustin Anti-Nail Bite Pen and consult a doctor if the irritation persists. In the case of contact lenses: we advise you to insert your lenses before using the Acetocaustin Anti-Nail Bite Pen.

STORAGE

Store at room temperature. Do not use the product after the expiry date.
